2. Please outline your jurisdiction's complete street project efforts to date, including planning and implementation.
3. How would you describe your jurisdiction's complete street *ethic*? In other words, outside of the rules or regulations that require certain complete street elements, how does your jurisdiction advance multi-modal, sustainable and safe rights-of-way in your every-day work?
4. Please describe your jurisdiction's efforts to link complete streets policies and implementation with land-use planning efforts.
5. We understand that priorities change over time, but generally, how does your jurisdiction intend to invest award funds, should they be received?
